

Thank you Boston.

Now we can
all breathe
a little easier.

You've taken the lead in protecting workers and the public from exposure to deadly secondhand smoke.

The Massachusetts Coalition for a Healthy Future commends the Boston Public Health Commission for approving a regulation to make Boston worksites smoke-free. With support from Mayor Menino, health experts, advocates, hotel and restaurant workers, businesses, bartenders, wait-staff and the people of Boston, the Commission has taken an historic step in protecting the health of workers, patrons and residents of the City.

Thanks for your leadership. We look forward to working with neighboring cities and towns to gain their support for smoke-free worksites.
