

Warning: Without your help, these people may die from secondhand smoke.

Secondhand smoke kills.
It causes lung and heart disease, cancer and death.

Thank you Council Member Reyna!

New York City Council Member Claudia Reyna has fought hard to protect New York City children and families through her continued support of school-based and community tobacco prevention programs.

We applaud her courage to protect our children.

Over 1 million New Yorkers are forced to breathe secondhand smoke where they work, play and eat.

Urge your Council Member to support Mayor Bloomberg's Strong Clean Air Bill.
