All population figures are from the United States Census 2000

- States with provisions listed in *blue italics* have enacted laws that are not in effect as of July 1, 2008.
- **Puerto Rico**, a U.S. Commonwealth, enacted a 100% smokefree law for all workplaces, restaurants, bars and gaming, which went into effect on March 2, 2007.

¹Includes both public and private non-hospitality workplaces, including, but not limited to, offices, factories, and retail stores.

²Includes any attached bar in the restaurant.

³Includes freestanding bars without separately ventilated rooms.

⁴Includes only non-tribal gaming facilities. Tribal gaming facilities are sovereign and not covered by state laws. States marked as having smokefree gaming facilities include at least one of the following types of gaming: Non-tribal casinos and racinos, card clubs, race tracks, and/or jai-alai centers. **For complete information on gaming, including bingo**, please see the document [100% Smokefree Casinos and Gaming](#).

Altogether, there are 13,689 municipalities covered by either local or state 100% smokefree laws in at least one of the three main categories (workplaces, restaurants, and bars). Since some have 100% smokefree coverage in more than one category, *the numbers are not mutually exclusive*. Due to the possibility of overlap, it can be confusing to understand what each of the figures on our lists mean. *Please give us a call if you need help determining the population with a particular type of 100% provision, or a particular combination of 100% provisions.*
