State (Representative Stone Roster) cares about your health. She voted to save the lives of thousands of Delaware residents and protect our children from Big Tobacco.

She voted YES to the Clean Indoor Air Act, which will establish most indoor public places as smoke-free, effective November 27, 2002.

**She had the courage to do what was best
for the health of all Delawareans.**

HELPING YOU BREATHE CLEAN AIR INDOORS...

On May 31, 2002, Delaware adopted the most protective Clean Indoor Air law in the nation — by making most indoor public place smoke-free. Your legislator supported the law because they wanted to PROTECT YOU from the dangerous effects of secondhand smoke.

DID YOU KNOW:

Secondhand smoke causes lung cancer and is carcinogenic to humans?

Every year, 1 in 5 Delawareans die from tobacco-related diseases?

More than 19,000 children in Delaware who are under 18 today will ultimately die prematurely from smoking?

Delaware ranks third in the nation for having the highest rate of lung cancer?

\$563 of your household's money went to smoking-related illnesses last year?

Delaware paid \$221 million last year in healthcare costs caused by smoking?

**Please THANK your legislator for protecting your right to breathe clean air
and for helping to reduce healthcare costs related to smoking illnesses!**
